Foreman - Refactor #11449

Don't use therubyracer anymore

08/22/2015 06:34 PM - Anonymous

Pull request:	https://github.com/theforeman/foreman/pull/2648		

Description

therubyracer has a longstanding history of problems on non-Linux and non-x86 platforms. It is used via the execjs gem, while execjs itself does support multiple engines and will select itself the one that's best from the available ones. GitLab went through all this and uses node.js now, which means the node.js package must be installed for all execjs related tasks.

therubyracer's easily available via RPMs, so continue using this for
assets compilation.

History

#1 - 08/24/2015 03:05 AM - Dominic Cleal

I'd probably like to support both (via bundler groups?) as using therubyracer is easiest for our RPM packaging, since it's already provided by the ruby193 SCL. Alternatively, there's a node010 SCL which may do.

#2 - 08/28/2015 06:04 PM - The Foreman Bot

- Status changed from Assigned to Ready For Testing

- Pull request https://github.com/theforeman/foreman/pull/2648 added

- Pull request deleted ()

#3 - 09/03/2015 05:55 AM - Dominic Cleal

- translation missing: en.field_release set to 63

I guess you're making a further change to the Debian packages for this? If you could update contribute.md as well on the website it'd be useful,

thanks.

#4 - 09/04/2015 05:52 AM - Dominic Cleal

- Status changed from Ready For Testing to Closed

- % Done changed from 0 to 100

https://github.com/theforeman/foreman-packaging/pull/799 is the corresponding change to Debian Jessie and Ubuntu Trusty packages. Everything else remains on therubyracer for now.
