Description		
Is it possible to implement a feature that allow us to export results of a search / bookmark into CSV format ? Will also be interesting in PDF format (essentially for charts) and maybe excel formant too ?		
Thanks

which pages? all pages, just the host list etc?

#2 - 09/09/2011 03:22 AM - NoName NoSurname

I would like to be able to :

- Export Dashboard / Statistics graphs in PDF format for presentation
- Export Hosts list in a csv or xls format for the Inventory
- Export Hosts / Facts (for example all hosts with 2 gig of ram) in a csv / xls format

It would be very nice to be able to do that as foreman contains all infra information.

So I don't know what's possible to do...

The export to csv and pdf would be a nice feature for reporting; and sending those reports to upper management / auditors.

I would like to perform any 'fact' search and export to csv or pdf what is displayed in the Web UI:

- 1) the host name
- 2) the fact name
- 3) the fact value
