#### History

##### #1 - 08/31/2015 02:16 AM - Tomer Brisker

- Subject changed from puppetclass table header has "Environments and documentation" but only shows envirnments to Puppet class index "Environment and Documentaion" links broken

The environments listed are supposed to be linked to puppet rdocs. However, the link is there even if the docs aren't present. Either remove the functionality if it is not needed (and update the column header) or show the link only if there are docs.
