| <b>Description</b>   |                           |
| <p>I would dearly love for Foreman to expand and fill the gap in my infrastructure currently filled by Rundeck. This is a huge feature request and so I put together a wiki page on it with as much initial information as I could think to flesh out. It may not be appropriate for Foreman or something you are willing to look at.</p> <p>You can see the page at <a href="http://www.theforeman.org/projects/foreman/wiki/Scripted_Processes">http://www.theforeman.org/projects/foreman/wiki/Scripted_Processes</a></p> |                           |

#### History

#1 - 02/29/2016 07:17 AM - Greg Sutcliffe

- Description updated

- Status changed from New to Resolved

With the introduction of plugins (specifically foreman\_hooks, foreman\_ansible, and foreman\_remote\_execution) I think we can say that there is a variety of ways to script things to happen either one-off, recurring, or trigger as part of a hook.

As such, I'm going to close this - do re-open if there's anything still missing.
