<b>Pull request:</b>		
<b>Description</b> Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1194900">https://bugzilla.redhat.com/show_bug.cgi?id=1194900</a> Description of problem: I'm not sure if this is something we're pulling from elsewhere, or if we named it this, but "Parametrized_Classes_in_ENC" shows in the Puppet table in Settings.  The more common spelling for that is Parameterized, as far as I know.  Version-Release number of selected component (if applicable): 6.0.6
