

Foreman - Bug #11650

Inherited variable fields empty in 'edit host' / 'new host' screens

Pull request:	https://github.com/foreman/foreman/pull/2663	

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1247617

Description of problem:

I have nested locations in my Satellite 6.1.0 setup: Amsterdam, Amsterdam/DC01 and Amsterdam/DC02.

DC01 and DC02 inherit a time-zone variable from Amsterdam.

Though it works fine, the field that should show the value of the time-zone variable when creating a new host / editing an existing one, is empty.

See attached screenshot.

Version-Release number of selected component (if applicable):

6.1.0 beta

foreman-1.7.2.32-1.el7sat.noarch

How reproducible:

Create nested locations, add variable to parent location, create new host in child location.

Steps to Reproduce:

1. Create nested locations
2. Add variable to parent location
3. Create new host in child location

Actual results:

Variable field is empty

Expected results:

Variable field should show variable value of parent location

Additional info:

I set the component to WebUI, because the correct value is actually in the YAML output: it's just not shown in the webui.

The screenshot explains this much better than I can.
