### Description

There are hash sum and size mismatches for the packages in the 1.9.0 stable branch.

Affected packages:
ruby-locale
ruby-apipie-bindings
ruby-kafo-parsers

cat /etc/apt/sources.list.d/foreman.list
deb http://deb.theforeman.org/ wheezy stable

error:
Failed to fetch http://deb.theforeman.org/pool/wheezy/stable/r/ruby-locale/ruby-locale_2.0.8-2_all.deb  Hash Sum mismatch
Failed to fetch http://deb.theforeman.org/pool/wheezy/stable/r/ruby-apipie-bindings/ruby-apipie-bindings_0.0.13-1_all.deb  Size mismatch
Failed to fetch http://deb.theforeman.org/pool/wheezy/stable/r/ruby-kafo-parsers/ruby-kafo-parsers_0.0.5-1_all.deb  Hash Sum mismatch

cat /etc/debian_version
7.8

Thanks.

## History

#### #1 - 09/02/2015 02:16 PM - Anonymous

for now please use "1.9" instead of "stable" in /etc/apt/sources.list.d/foreman.list.

#### #2 - 09/03/2015 05:41 AM - Dominic Cleal

*- Status changed from New to Closed*

*- Assignee set to Dominic Cleal*

*- % Done changed from 0 to 100*

Thanks, I was missing a step when changing the stable symlink - to delete the current contents of "stable" in the web directory, letting freight recreate it.

http://projects.theforeman.org/projects/foreman/wiki/Release_Process/diff?utf8=%E2%9C%93&version=137&version_from=136&commit=View+differences is updated with the extra step.
