Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1241077	
Description of problem:	
Settings unquoted Integer values are resulting in an error that an integer is required. Changing it to a quoted value does not give this error. I would expect the otherway around that a quoted integer shall give an error instead.	
This is also a regression compared to 6.0.8 that accepted the unquoted integer value.	
1. curl -K /opt/hoici/etc/sat6/curl-hoici.conf "-HContent-Type: application/json" "-d{\\"per_page\\":9999,\"setting\\\":{\"value\\":60}}" -XPUT https://localhost/api/v2/settings/52 { "error": {"id":52,"errors":{"value":["is invalid: must be integer"]},"full_messages":["Value is invalid: must be integer"]} }
