Foreman - Bug #11688

Syntax highlighting defaults to text when editing provisioning templates

Pull request:	https://github.com/theforeman/foreman/pull/2697		

Description

Since #11625, the default syntax highlighting for a provisioning template is now "text" rather than "ruby", which it used to be. Most provisioning templates contain either Ruby (ERB) or shell scripts, so either ruby or sh highlighting would be reasonable defaults I think.

Or if we don't want to change the default, perhaps a cookie could be used to remember the user's choice.

Revision a265235e - 09/10/2015 02:28 PM - Walden Raines

Fixes #11688: default text editor to ruby.

Instead of defaulting to text, default to ruby syntax highlighting.

Would be nice to have this per template type.

Yeah, that makes a lot of sense with say, a cloud-init template which is usually YAML.
