<b>Pull request:</b> <a href="https://github.com/theforeman/foreman/pull/2698">https://github.com/theforeman/foreman/pull/2698</a>	
<b>Description</b>	
ace-rails-ap was added in <a href="#">#11625</a> at version 3, but the latest is 4. It has some changes to precompilation, so the worker files are automatically precompiled.	
The precompilation list (config/environments/production.rb) ought to be tidied at the same time, as many of the files being precompiled probably aren't needed as they're required into the main app.js via vendor/javascripts/vendor.js instead.
