The last line "2015-09-04T15:47:25 [sql] [I] Adding autosign entry for pxeboot.example.com" before the error probably indicates that it was contacting the Puppet CA smart proxy and trying to add the host to /etc/puppet/autosign.conf.

Check the smart proxy's proxy.log file to see if there are any failures logged.

Thanks, fix permission for autosign on foreman\_proxy:foreman\_proxy, and all ok. thx.
