

Katello - Bug #11698

Unregistering content hosts returns you to a page with a warning (rather than just the outcome)

Description 1. Using the Foreman UI, select one or more hosts under Hosts->Content Hosts. 2. Select Bulk Actions->Unregister Content Hosts. 3. The hosts are removed, but the page you are returned to says: 'At least one content host needs to be selected in order to perform a bulk action.' Rather than perhaps just confirming the outcome of the action.
