<b>Description</b>		
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1188839">https://bugzilla.redhat.com/show_bug.cgi?id=1188839</a>		
Description of problem: When adding an external LDAP authentication source, provide a validate feature within the WebUI to verify settings used. Similar to what CloudForms offers.		
Version-Release number of selected component (if applicable): Sat 6		
How reproducible: N/A		
Steps to Reproduce: 1. Navigate to Administer > LDAP Authentication 2. Click New LDAP Source and enter desired values 3. Under the Account tab provide a validate feature		
Actual results: No validate feature today. It is a guess on proper values to enter and know they are correct.		
Expected results: Provide a validate feature for account settings used for the LDAP server.		
Additional info: N/A
