Description

As a fix for [#11171](), the select2 was disabled on compute profile selects. However, when new select box is added, for example via "Add Interface" button, this select box is select2 again

I don't think it should have been disabled in actual fact, given that's what the feature was added for in the first place. I think I misunderstood the intention of [#11171]() when reviewing it.

They work reliably now on the interfaces modal so it ought to be possible to have them work in profile editing too.
