

Foreman - Bug #11741

Config group host counter not incremented on host creation with association

09/09/2015 05:04 AM - Dominic Cleal

<b>Status:</b>	Resolved	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Puppet integration	
<b>Target version:</b>		
<b>Difficulty:</b>

<b>Bugzilla link:</b>		
<b>Pull request:</b>		<b>Fixed in Releases:</b>
		<b>Found in Releases:</b>
		<b>Red Hat JIRA:</b>
<b>Description</b>		
When creating a host with a config group associated, the hosts counter on the config groups list is not updated. It does get updated if the config group is associated after the host is created.		
It appears that the after_add hook in app/models/concerns/host_common.rb performs a search for hosts with the config group during the host creation, so this won't pick up the host that's in the process of being created.

- Status changed from New to Resolved
- cached counters have been removed in [#12193](#) and this should be resolved now as the count is calculated on the fly when needed.
