

Foreman - Bug #11741

Config group host counter not incremented on host creation with association

09/09/2015 05:04 AM - Dominic Cleal

Status: Resolved	
Priority: Normal	
Assignee:	
Category: Puppet integration	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>When creating a host with a config group associated, the hosts counter on the config groups list is not updated. It does get updated if the config group is associated after the host is created.</p> <p>It appears that the after_add hook in app/models/concerns/host_common.rb performs a search for hosts with the config group during the host creation, so this won't pick up the host that's in the process of being created.</p>

- Status changed from New to Resolved

cached counters have been removed in [#12193](#) and this should be resolved now as the count is calculated on the fly when needed.
