

Foreman - Bug #11749

new host puppet environment jquery selector too liberal

09/09/2015 11:23 AM - Justin Sherrill

Status:	Closed	Fixed in Releases: Found in Releases: Red Hat JIRA:
Priority:	High	
Assignee:	Justin Sherrill	
Category:	Host creation	
Target version:	1.12.1	
Difficulty:	medium	
Triaged:		
Bugzilla link:		
Pull request:	https://github.com/foreman/foreman/pull/3642	
Description		
When creating a host or hostgroup and selecting just the puppet environment, no puppet classes get loaded on the 'puppet classes' tab. The user has to select a lifecycle env and content view and only then will they be loaded.		
Once those are selected the user can change the puppet env at will, but this should not be required

Associated revisions

Revision 4eeea973 - 07/14/2016 02:53 AM - Justin Sherrill

Fixes #11749 - puppet env jquery selector more restrictive

This current jquery selector for puppet environment selection would match any select box where name included environment_id. This caused issues with katello as we put a field containing lifecycle_environment_id in the form

Revision 70aad752 - 07/22/2016 10:05 AM - Justin Sherrill

Fixes #11749 - puppet env jquery selector more restrictive

This current jquery selector for puppet environment selection would match any select box where name included environment_id. This caused issues with katello as we put a field containing lifecycle_environment_id in the form

- Related to Bug #13988: Hostgroups Puppet Class management issue added

#7 - 07/12/2016 10:45 AM - Justin Sherrill

- Project changed from Katello to Foreman
- Subject changed from puppet class population on new host/hostgroup page requires lifecycle env/content view selection to new host puppet environment jquery selector too liberal
- Category changed from 83 to Host creation
- Status changed from New to Assigned

This appears to be a result of <https://github.com/theforeman/foreman/blob/develop/app/assets/javascripts/application.js#L387>

this selector:

```
$('select[name*=environment_id]')
```

seems to be matching 'name=host[environment_id]' but its also matching 'name=host[content_facet_attributes][lifecycle_environment_id]'

We should make the selector more restrictive. Moving to foreman
