

Foreman - Bug #11778

Logger makes application fail on other RAILS_ENVs

09/10/2015 06:40 PM - Daniel Lobato Garcia

Status: New	
Priority: Normal	
Assignee:	
Category: Logging	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
If RAILS_ENV is set to anything that is not configured on logger.yaml, rails fails to load with a message:	
<pre>`deep_merge!': undefined method `each_pair' for nil:NilClass (NoMethodError) from /home/daniel/.rbenv/versions/2.1.5/lib/ruby/gems/2.1.0/gems/activesupport-3.2.21/lib/ active_support/core_ext/hash/deep_merge.rb:10:in `deep_merge' from /home/daniel/workspace/cleanforeman/lib/foreman/logging.rb:78:in `load_config' from /home/daniel/workspace/cleanforeman/lib/foreman/logging.rb:17:in `configure'</pre>	
The message should be clearer or we should use the default on environments not defined in logger.yaml.
