Foreman - Bug #11782

Puppet override with invalid hash array doesn't give error

09/11/2015 09:40 AM - Jon Skarpeteig

Status:	Closed		
Priority:	Normal		
Assignee:	Dominic Cleal		
Category:	Parameters		
Target version:	1.10.0		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	1.8.2
Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/2755		

Description

When modifying Puppet class changing default value to a hash with invalid syntax - there's an error.

When editing a host definition editing the same value - the submit/save completes successfully, while ignoring the (invalue) value entered.

This in turn leads to confusion as it seems as if the host override completed successfully when in fact it did not.

Associated revisions

Revision 00335956 - 10/01/2015 11:25 AM - Dominic Cleal

fixes #11375, #11782 - validate a host's lookup_values

Enabling validation ensures the casting and validation within
LookupValue runs during host/hostgroup save. Tweaks to hostgroup
cloning ensure that the newly cloned hostgroup now passes validation
when it has associated lookup values.

Don't show any LookupValue#match errors in the host/hostgroup forms
as the value is autogenerated by the nested attribute setter.
