Description

Hello,

All is in the subject. I don't know if it is possible to use the hostgroup attribute of a host in a puppet template but when i use "<%= hostgroup %>" in a template I have this error : Could not find value for 'hostgroup'.

It is possible ? It is an other name of attribute ?
It is possible to add this possibility ?

Thanks for all.

Associated revisions

Revision e20f5716 - 09/27/2011 04:11 AM - Ohad Levy

fixes #1179 - exposes foreman attributes in enc
this includes:

- hostgroup
- root password (when in unattended mode)
- foreman env (workaround for puppet enc bug)
- owner name
- owner email (or array of emails if its a group)

Revision 052dc65f - 09/27/2011 04:16 AM - Ohad Levy

refs #1179 - hostname name in enc should include its parents too

Revision 771129f2 - 10/03/2011 03:20 AM - Ohad Levy

adds host description as an ENC parameter refs #1179
