

Foreman - Bug #11847

Override of global parameter on host form creates empty name/value row

09/16/2015 07:35 AM - Dominic Cleal

Status:	Closed	Fixed in Releases: Found in Releases: Nightly Red Hat JIRA:
Priority:	Normal	
Assignee:	Shlomi Zadok	
Category:	Host creation	
Target version:	1.10.0	
Difficulty:		
Triaged:		
Bugzilla link:		
Pull request:	https://github.com/foreman/foreman/pull/2744	
Description		
The host edit form fails to override global, inherited parameters correctly, just creating an empty name/value row without any existing name/value.		
The new_param variable in the override_param function seems to be picking up the wrong elements, then it can't find the name/value from the existing parameter.		
Tested on 570fb4c.
