<b>Bugzilla link:</b>		
<b>Pull request:</b>		
<b>Description</b>		
foreman-0.4-0.1rc1.noarch		
Installed via the puppet modules (0ae6d7adcff6c6a5904cdd356bce35988de7a419)		
I've added one client to a fresh install. I then try to add a hostgroup and get:		
The following error message was observed: undefined method `domain_id' for #		
If you feel this is an error with Foreman itself, please open a new issue with Foreman ticketing system, You would probably need to attach the Full trace and relevant log entries.		
undefined method `domain_id' for # ActionView::TemplateError		
app/views/common/_domain_subnet.html.erb:2 app/views/hostgroups/_form.html.erb:26 app/views/hostgroups/_form.html.erb:25 app/views/hostgroups/_form.html.erb:14 app/views/hostgroups/_form.html.erb:1 app/views/hostgroups/new.html.erb:3		

#### History

##### #1 - 09/28/2011 04:48 AM - Ohad Levy

- Status changed from New to Feedback
- Priority changed from Immediate to Normal

I can't reproduce this.

both with and without unattended settings.

when you mean add a host group, is it to add it to the host, or create a new host group?

##### #2 - 10/06/2011 04:34 PM - Jeff Palmer

- Status changed from Feedback to Closed

After reinstalling foreman 0.4rc1, this issue is not re-occurring. Closing the ticket.
