

## Foreman - Bug #11850

### DNS error message assumes two nameservers

09/16/2015 07:54 AM - Dominic Cleal

<b>Pull request:</b> <a href="https://github.com/foreman/foreman/pull/2733">https://github.com/foreman/foreman/pull/2733</a>	
<b>Description</b>	
The error message used by the DNS conflict check to handle DNS resolution failures assumes the domain always has zero or two nameservers. Given the implementation of Domain#nameservers, which can return 0-many, it shouldn't be hardcoded to two. <a href="https://github.com/foreman/foreman/pull/2680/files#diff-2e08cc169e9a6f52d8ede37144c208acR179">https://github.com/foreman/foreman/pull/2680/files#diff-2e08cc169e9a6f52d8ede37144c208acR179</a>

Doesnt our UI force you to enter 0-2?

In the worst case there will be "nil" in the error message, the code works just fine.

Domain#nameservers uses SOA and NS records, I think you're thinking of the subnet dns\_primary/secondary fields which are different and not used here.

In the worst case there will be "nil" in the error message, the code works just fine.

Yeah, or missing nameservers in the error message. This is why I've filed it as low priority.

##### #4 - 09/17/2015 06:42 AM - The Foreman Bot

- Status changed from New to Ready For Testing

- Pull request <https://github.com/foreman/foreman/pull/2733> added

- Pull request deleted ()

##### #5 - 09/17/2015 11:03 AM - Dominic Cleal

- Assignee set to Lukas Zapletal

- translation missing: en.field\_release set to 63

**#6 - 09/17/2015 12:02 PM - Lukas Zapletal**

- Status changed from Ready For Testing to Closed

- % Done changed from 0 to 100
