Foreman - Bug #119

Child classes more than one layer deep in modules get missed

12/07/2009 06:56 PM - Frank Sweetser

Status:	Closed		
Priority:	Normal

Pull request:			

Description

The puppet:import:puppet_classes task only looks for pp files in the top level directory of each module, meaning that any classes contained in subdirectories get missed. Simple one line fix attached.

Associated revisions

Revision 380dd66b - 12/08/2009 03:28 AM - Frank Sweetser

fixes #119 - Recurse into module directories when looking for classes

History
