Foreman - Bug #11908

Unable to cancel "request is being processed" window when editing a host

09/22/2015 04:52 AM - Julien Pivotto

Status:	Closed		
Priority:	Normal

Pull request:	https://github.com/theforeman/foreman/pull/2817		

Description

when you click "edit" in a host you have that modal:

"Loading... Spinner
Please wait while your request is being processed"

The modal has a close (X) button, I was expecting it just to cancel the action but it only hides the modal and the edit request keeps processing.

Should we:

1. Remove the Close button
2. Really cancel the action

I think this applies in several locations

Julien, great, on it.

#8 - 10/14/2015 03:23 AM - Alon Goldboim

Its bad UX but i can see that the purpose of the close button was to close the alert panel and not cancel the routing.
Im removing the btn.

This is annoying when you have a request that fails. It would be better to really be able to cancel the request (maybe with an explicit cancel button)

Another behaviour would be that when a request fails an error message replaces modal.

It is very annoying not to have the close button when you have 500 errors or network errors.

#11 - 10/14/2015 04:19 AM - Dominic Cleal

- translation missing: en.field_release set to 63

Seems your comment was missed, it's been merged without cancelling the request - only removing the button.

#12 - 10/14/2015 05:01 AM - Alon Goldboim

- Status changed from Ready For Testing to Closed

- % Done changed from 0 to 100

Applied in changeset 2b647d937e739b7e87b371d971a8e2ebdf65fa63.
