Description	
<p>When I edit an existing hostgroup and I add a parent relationship with an other hostgroup , if a class is included in the two hostgroup, the class is not deduplicated.</p> <p>It would be nice to remove automaticaly class including in child hostgroup.</p> <p>Thx in advance.</p>

fixes #1191 - removes duplicated classes when nesting hostgroups

History

#1 - 10/02/2011 11:30 AM - Ohad Levy

should this happen automatically? while its probably easy to implement, I was not sure if this would raise any confusion?

#2 - 11/09/2011 11:36 AM - Romain Vrignaud

edit : It would be nice to remove automaticaly class includED in child hostgroup.

I don't see where could be the confusion. This would be the more logical because affecting 2 times a class is a puppet non-sense.

It would make transition to former hostgroup management to nested hostgroup much much easier.
