Foreman - Bug #12034

Validation of unique MAC can result in false positive

10/01/2015 11:41 AM - Marek Hulán

Status:	Closed		
Priority:	Normal		
Assignee:	Marek Hulán

Pull request:	https://github.com/theforeman/foreman/pull/2775		

Description

We skip validations of MAC uniqueness on virtual and unmanaged interfaces. But when we check the validity on managed physical interface we take into consideration also these interfaces that were validly created. We should scope the interfaces that we compare. It was introduced by #11034
