

Foreman - Feature #1211

allow both id and fqdn as an id

10/04/2011 05:56 PM - Gustavo Soares

Status: Closed	
Priority: Normal	
Assignee: Ohad Levy	
Category: API	
Target version: 0.4	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
When interacting with the rest api, some resources return the host id. Sometimes, it is useful to retrieve the host information from that particular id.	
Here is the patch (provided by Ohad at the #theforeman irc channel)	
https://github.com/gustavosoares/foreman/commit/5bafd62b2467aaf5389538fcda937639bdde5750

History

#1 - 10/05/2011 04:37 AM - Ohad Levy

- Category set to API
- Assignee set to Ohad Levy
- Target version set to 0.4

#2 - 10/05/2011 04:37 AM - Ohad Levy

- Status changed from New to Closed
- % Done changed from 0 to 100

Applied in changeset [d1d29d085b1ab671d0358005b27724a3094bc907](#).

#3 - 10/17/2011 12:10 PM - Gustavo Soares

Ohad,

After running some more tests I noticed that the external nodes script was (always) receiving NOT FOUND.

Error retrieving node abc.globoi.com: Net::HTTPNotFound

Should the filter find_by_name be applied to the action externalNodes in app/controller/hosts_controller.rb?

yes, I've noticed it already, and afair it has been fixed already.
there was a ui related issue too (when clicking on the yaml link) and that should be already solved in the newui branch.
