Docker - Bug #12116

`hammer compute-resource create -h` do not mention Docker

10/08/2015 04:59 PM - Bryan Kearney

Status:	New		
Priority:	Normal		
Assignee:			
Category:	Plugin (foreman_docker)		
Target version:			
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:	1190790	**Red Hat JIRA:**	
Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1190790
Description of problem:
`hammer compute-resource create -h` do not mention Docker. E.g. help text for "--url" says "URL for Libvirt, RHEV, and Openstack".
Also in webUI when creating Docker compute resource I see fields "Username", "Password" (I do not know what are these for, but
`hammer compute-resource create -h` do not mention Docker in the help text) and "Email" (again, I do not see what is this for, but in
hammer I do not see a way how to supply this).

Version-Release number of selected component (if applicable):
Satellite-6.1.0-RHEL-7-20150205.0-Satellite-x86_64

How reproducible:
always

Steps to Reproduce:
1. # hammer compute-resource create -h | grep -i Docker

Actual results:

1. hammer -u admin -p changeme compute-resource create -h
   Usage:
   hammer compute-resource create [OPTIONS]

Options:
--description DESCRIPTION
--location-ids LOCATION_IDS   REPLACE locations with given ids
Comma separated list of values.
--locations LOCATION_NAMES   Comma separated list of values.
--name NAME
--organization-ids ORGANIZATION_IDS   REPLACE organizations with given ids.
Comma separated list of values.
--organizations ORGANIZATION_NAMES   Comma separated list of values.
--password PASSWORD   Password for RHEV, EC2, Vmware, Openstack. Secret key for EC2
--provider PROVIDER   Providers include
--region REGION   for EC2 only
--server SERVER   for Vmware
--set-console-password SET_CONSOLE_PASSWORD for Libvirt and Vmware only
One of true/false, yes/no, 1/0.
--tenant TENANT   for Openstack only
--url URL   URL for Libvirt, RHEV, and Openstack
--user USER   Username for RHEV, EC2, Vmware, Openstack. Access Key for EC2.
--uuid UUID   for RHEV, Vmware Datacenter
-h, --help   print help

Expected results:
I would expect Docker is mentioned at least in description of "--url" option. If it makes sense, should be there for "--user" and
"--password" and maybe "--email" should be added.

History

#1 - 10/09/2015 03:03 AM - Dominic Cleal

- Project changed from Hammer CLI to Docker

- Category set to Plugin (foreman_docker)

- Assignee deleted (Martin Bacovsky)

Setting to the plugin as it will need to extend the API docs as appropriate. You may well need to file another ticket against Foreman core for whatever changes are needed there to support doing so.

#2 - 07/27/2016 11:12 AM - Ivan Necas

- Target version set to 1.7.0

#3 - 08/16/2016 05:56 AM - Ivan Necas

- Target version changed from 1.7.0 to 1.6.1

#4 - 09/08/2016 07:42 AM - Ivan Necas

- Target version changed from 1.6.1 to 127

#5 - 09/27/2016 09:06 AM - Ivan Necas

- Target version changed from 127 to 1.5.1

#6 - 09/27/2016 09:08 AM - Ivan Necas

- Target version changed from 1.5.1 to 113

#7 - 09/27/2016 09:09 AM - Ivan Necas

- Blocked by Feature #16630: Need a way to extend existing apipie specification added
