As a workaround, you can "yum install foreman-compute".

The issue comes from being able to install the GCE support (bundler group) without the Fog group (foreman-compute). The view helper shouldn't assume that the Fog::Compute::OpenStack class exists (simply doing vm.class.name and comparing strings would be enough).

- Difficulty set to trivial

Sorry, this hasn't been fixed in time for the 1.9.3 release, unsetting.
