

Foreman - Bug #1220

Issue with the search API with facts and "OR" operator

10/10/2011 09:42 PM - Brian Gupta

Pull request:	
Description	
Basically it spits out the same hostname multiple times:	
<pre>./foreman-cli3 --server https://foreman/ --custom hosts?search=+facts.processorcount+%3D+1++or+facts.domain+%3D+domain1.com --json uniq -c 1 [82 "app1.domain1.com", 82 "app2.domain1.com", 56 "test1.domain2.com", 1 "test1.domain2.com" 1]</pre>	
Doing a little further digging leads me to the conclusion that the search is returning the host name an equal number of times to the number of facts that host has registered with foreman.	

History

Looks like this might be a duplicate of <http://theforeman.org/issues/1181>

#2 - 10/10/2011 09:47 PM - Brian Gupta

- Status changed from New to Closed

Closing issue. It is almost certainly a duplicate of [#1181](#)
