Description	
<p>At this time, only network and netmask are parsed from DHCP server configuration. This patch add ability to retrieve following informations, if configured for the current subnet:</p> <ul style="list-style-type: none">• Gateway• Primary DNS server• Secondary DNS server• DHCP range (from IP addr...to IP addr) <p>This feature, will provide a way to import these information from the foreman 'subnets import' feature.</p> <p>The pull request will only provide the ISC dhcp implementation.</p>
