

Foreman - Bug #12278

Foreman fails when creating a role if default user has 2 or more filters with same permission

Description		
After https://github.com/foreman/foreman/commit/1f5d2516f7acd537cf996aeb3f52e0bf9c17c2d7 we build a role with permissions of default user. If default user has two or more filters with same permission (valid setup), the verification of found collection fails (https://github.com/foreman/foreman/blob/develop/app/models/role.rb#L135). We have to make the list unique.

Fixes #12278 - make sure permission set is uniq for role

If default user has two or more filters with same permission (valid setup), the verification of found collection failed. This patch make the list uniq and the check correctly verifies whether all permissions were found.
