| Pull request: https://github.com/foreman/foreman/pull/2863 | |
| Description | |
| When you try to edit role you can see that there's just name of role displayed without label. The issue was introduced in #11466 - https://github.com/foreman/foreman/pull/2633/files#diff-d07b3cdd6c00768e06bfed349d3c808fR212 we need to capture the output so it's rendered later when we use label helper. | |

#4 - 10/23/2015 09:21 AM - Dominic Cleal

The linked issue's due in 1.10.0, can we set this to .0 as well rather than .1, since it's a regression?

#5 - 10/23/2015 09:23 AM - Marek Hulán

- translation missing: en.field_release changed from 104 to 63

Ah sure, sorry, I didn't realize we can still merge fixes to 1.10

#6 - 10/23/2015 09:24 AM - Dominic Cleal

Yeah, usually at this point any regression fixes will keep going into .0 to stabilise the RCs, and any general/existing bug fixes can be deferred until .1 (so as not to destabilise RCs further).
