Pull request:	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1270771 Description of problem: Unable to choose a different value of memory for compute profile under RHEV other then dropdown list. Version-Release number of selected component (if applicable): Satellite 6.1.2 How reproducible: 100% Steps to Reproduce: 1. Add RHEV as a compute resource 2. Modify a compute profile and check the memory field 3. Actual results: Can only choose predefined memory from a dropdown list, Expected results: Ability to set a specific value for memory like you can do for ESX compute resource.
