

Foreman - Bug #12306

Puppet classes from Host Group are not populated when creating a new Host

10/26/2015 07:50 AM - Jitendra Yejare

Status: Rejected	
Priority: Normal	
Assignee:	
Category: Host creation	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: Nightly
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Description of problem: Noticed that when I tried to create a new Host and selected my Host Group (which contains information about which puppet class to include), the puppet class section was not automatically populated with the puppet class I had selected for my Host Group:	
Version-Release number of selected component (if applicable): foreman-1.11.0-0.develop.201510221551git1d0315e.el7.noarch	
Steps to Reproduce: 1. Create a Host Group and add any puppet class to it 2. Create a new Host and use the Host Group created above	
Actual results: The puppet class added in Host Group is not automatically added to the new Host form.	
Expected results: The puppet class added in Host Group should be automatically added to the new Host form.	
Note 1: This bug has impact on 'Parameters' tab in New Host as the parameters in New Host page are displaying twice. That is one from itself (by selecting puppet class while creating new host) and second from Host Group.	
Note 2: Also the referred downstream bug has been already closed with fix.	

History

#1 - 10/26/2015 07:56 AM - Dominic Cleal

- Subject changed from *Puppet classes from Host Group are not populated when creating a new Host* to *Puppet classes from Host Group are not populated when creating a new Host*

- Status changed from *New* to *Need more information*

- translation missing: *en.field_release* deleted (71)

Can you show the Puppet classes tab, which is presumably where you're checking if it's associated?

Please also include production.log at debug level (<http://theforeman.org/manuals/1.10/index.html#7.2Debugging>) during the selection of the host group.

Not sure how the double listing of class parameters is related, sounds like you're following different reproducer steps for that.

#2 - 10/26/2015 08:13 AM - Thomas McKay

- Bugzilla link deleted (1269229)

Seemingly related to https://bugzilla.redhat.com/show_bug.cgi?id=1269229

#3 - 02/29/2016 05:46 AM - Jitendra Yejare

- File puppetClass_TabFromHost.png added
- File puppet class selected in HG.png added
- File HG Selected in Hoat.png added

I see This issue is reproducible on the build of 26th Feb 2016.

I am attaching the screenshot here

#4 - 02/29/2016 06:00 AM - Dominic Cleal

Missing logs as mentioned above. Also, please try reproducing on a Foreman-only installation, it changes that form and it's possible that the bug is there (probably why I can't see it).

#5 - 05/17/2017 03:23 PM - Anonymous

- Status changed from Need more information to Rejected

no reaction, closing
