

Foreman - Bug #12393

Overriding the parameter default value doesnt adds 1 to the 'Number of Values' count.

11/04/2015 07:18 AM - Jitendra Yejare

Status: Closed	
Priority: Low	
Assignee: Tomer Brisker	
Category: Web Interface	
Target version: 1.11.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: Nightly
Bugzilla link: 1277952	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/3179	
Description	
Description of problem: Overriding the parameter default value doesnt adds 1 to the 'Number of Values' count in parameters table in Config -> Smart Class Parameter page.	
Version-Release number of selected component (if applicable):	
How reproducible: Always	
Steps to Reproduce: 1. Override smart class parameter, set the default value. 2. Don't check 'puppet default value' checkbox. 3. See the 'Number Of Values' column for that parameter in Config -> Smart Class Parameters.	
Actual results: The count doesn't adds 1 to the 'Number of Values' for that parameter.	
Expected results: The count for 'Number of Values' should be increased by 1.

Please don't set the release field.

Setting the default value is not creating an override, that's the section at the bottom of the form with specific matchers. This appears to be correct behaviour to me.

But the column says the 'number of values' the parameter has and by giving default value which is atleast one value. And so I believe this needs to be fixed.

It will also help to identify that What are the parameters whose only default value has been overridden from table itself.

It'd be better to call it the number of overrides since it's a counter, and if you need some way to indicate the presence of a default value, to indicate it another way.
