| Pull request: https://github.com/theforeman/community-templates/pull/211 | |
| Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1187520 Description of problem: If one reviews the provisioning template of a client enrolled in IPA through the REALM proxy, the IDM snippet which enrolls the host can't be seen. Version-Release number of selected component (if applicable): Satellite-6.0.6 How reproducible: Every time Steps to Reproduce: 1. Hosts -> All hosts -> <select a host> 2. Templates -> review provisioning template 3. Do note that the Identity Management Registration Snippet is missing Additional info: now try pressing the button "enable rebuild on next host boot" and then fetch http://sat6.rhcddev.acme.net/unattended/provision?token=bbc364a5-3a1f-4ccc-91fc-bb5f14dd95be Do note that this kickstart file <i>does</i> include the Identity Management Registration Snippet | |
