Description		
When trying to delete an nonexistent host via omshell the ISC DHCP proxy an exception is raised and an error returned to Foreman. This causes issues with Host::Managed.populate_fields_from_facts.

Revision f24be74d - 11/16/2015 09:01 AM - Brandon Weeks

Fixes #12469 - raise Proxy::DHCP::InvalidRecord

Raise Proxy::DHCP::InvalidRecord if delRecord is called on a nonexistant record by looking for the `omshell` error.

Note that Foreman deliberately ignores a 404 HTTP response from the smart proxy during DHCP record deletion, expecting a 404 to be given if there's no such record to delete. I've not checked yet whether this has changed in the proxy between versions.

- translation missing: en.field_release deleted (63)

Removing from the 1.10.0 blockers as it seems to stem entirely from the linked bug, where a deleted entry is still being picked up and so dhcp_api doesn't return with a 404 early.

- translation missing: en.field_release set to 104

Leaving on .1 so we've got more time to soak test this change. The regression ([#12465](#)) needs to go in sooner as it'll fix more than this will.
