- Status changed from New to Need more information

It's installed from two places:

- 1) The foreman-installer RPM has it as a hard dependency.
- 2) puppet-foreman has a \$selinux parameter, which installs it when SELinux is enabled (from facts).

<https://github.com/theforeman/puppet-foreman/blob/5.0.1/manifests/params.pp#L59-L61>
