### Description

When creating a host network based foreman creates the host image based because the image_id is always set.

in app/models/compute_resources/foreman/model/vmware.rb create_vm

if args[:image_id].present?
should be
if args[:provision_method] == 'image'

## History

### #1 - 11/18/2015 07:47 AM - Dominic Cleal

I think the image_id in the New Host form is disabled for a network build so **shouldn't** be sent in the form parameters. This might happen if the image_id is stored on a compute profile as it'll get copied in regardless. #10237 reports this too from inside a plugin or the API.
