Revision 263edc74 - 10/31/2016 04:23 AM - Amir Fefer

Fixes #12543 - enable utf-8 encoding in email address

According to RFC 6532, the local part of an email address
can be non-ascii characters, and should support in utf-8.
The current email validation doesn't allow it,
so emails like Pelé@example.com and □□@example.com are not supported

Revision a011df46 - 03/16/2017 04:18 AM - Dominic Cleal
