

Foreman - Bug #12554

Operating System description is shown in name column

11/20/2015 01:50 PM - Og Maciel

Status: Closed	
Priority: Normal	
Assignee:	
Category: Web Interface	
Target version: 1.11.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1283941	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/2925	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1283941	
Description of problem: If you create new operating system without description - application has correct behavior and you can see that new OS name in name column and hosts count in hosts column. But if you specify any description for operating system, so that description will be displayed in name column instead OS name. That is even more confusing when you use search functionality and search for OS with "name='AAAA'", but get entity with name='BBBB'	
Version-Release number of selected component (if applicable): Hard to tell when that issue was introduced	
How reproducible: Always	
Steps to Reproduce: 1. Create new operating system (Hosts->Operating systems) with description	
Actual results: You see entity description in name column	
Expected results: You see entity name in name column

Revision 6308a7ba - 12/07/2015 10:50 AM - oshtaier

Fixes #12554 - Change OS name column heading to match contents

It is necessary to change name for 'Name' column to 'Title' as otherwise application flow can confuse user (especially when he or she perform search procedure). Also, add more context to description field for Operating System create/edit screen
