

## Smart Proxy - Bug #1260

### autosign.conf doesn't support puppet enterprise

10/25/2011 10:46 PM - Corey Osman

<b>Description</b>	
smart-proxy should be looking for /etc/puppetlabs/puppet/autosign.conf instead of /etc/puppet/autosign.conf	
Adding autosign entry for puppetmaster.logicminds.corp Failed to add puppetmaster.logicminds.corp to autosign file: Failed to enable autosign for puppetmaster.logicminds.corp: Permission denied - /etc/puppet/autosign.conf Filter chain halted as [:handle_ca] rendered_or_redirected. Completed in 833ms (View: 1, DB: 2)   200 OK [http://192.168.1.18/unattended/provision]	

#### History

##### #1 - 10/25/2011 10:46 PM - Corey Osman

- Target version set to 0.3

##### #2 - 10/26/2011 12:38 AM - Ohad Levy

- Status changed from New to Feedback

afair it does, you simply didnt select the puppet proxy in your host.

##### #3 - 10/26/2011 02:06 AM - Corey Osman

I think the problem was that I had puppet and puppet enterprise installed and smart-proxy picked the puppet autosign.conf instead of the puppet enterprise autosign.conf. Can you add this option to the settings.yml so the user can specify?

```
autosign_location: /etc/puppetlabs/puppet/autosign.conf
```

```
default: /etc/puppet/autosign.conf
```

##### #4 - 11/08/2011 01:46 PM - Ohad Levy

- Target version deleted (0.3)

##### #5 - 07/04/2012 06:38 AM - Benjamin Papillon

This issue is now handled with smartproxy. Please use the following line inside the settings.yml in smart proxy :

```
:puppetdir: /etc/puppetlabs/puppet
```
