Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Its annoying to always type in unattended/provision?spoof=IPADDRESS all the time to ensure my provision scripts work as expected. Can you add a shortcut to the host page that spoofs the IP.	

Associated revisions

Revision 23161409 - 11/08/2011 10:04 AM - Amos Benari

fixes #1261 - show templates in host-show page

History

#1 - 10/25/2011 11:26 PM - Corey Osman

have it open up in a new window instead of the current window.
