fixes #12615 - remove unused term-ansicolor dependency

Under Ruby 1.9.3, `bundle pack` is usually failing to resolve the tins dependency between rubocop and term-ansicolor.

Remove the term-ansicolor dependency, which appears to be a development-only dep of pry's coderay dep. coderay's syntax colour support works fine without it at runtime.

- Related to Bug #12431: tins 1.7.0 requires Ruby 2.0 or higher added

#3 - 11/26/2015 08:18 AM - David Davis

Not sure how much it helps us but rubocop has since removed the tins requirement:

<https://github.com/bbatsov/rubocop/commit/dfa1f9b6a2ad2f3d0d7e97a481665f68d4097f17#diff-458bc38d82061cdac508dfb1be2b918bL48>

#4 - 12/01/2015 09:39 AM - Dominic Cleal

Unsure if this is an intermittent issue or something has changed subtly to prevent it, as the latest nightly build succeeded:

http://ci.theforeman.org/job/packaging_build_deb_coreproject/arch=x86.label=debian.os=trusty/2632/consoleFull

I'll continue to monitor it.

- Pull request <https://github.com/theforeman/foreman/pull/2956> added

#8 - 12/03/2015 04:36 AM - Dominic Cleal

Running bundle pack --all under Ruby 1.9.3 without an existing Gemfile.lock seems to reproduce it for me locally.
