

Foreman - Bug #12637

Improve DHCP lease unit test

11/30/2015 09:50 AM - Lukas Zapletal

Status: Closed	
Priority: Normal	
Assignee: Lukas Zapletal	
Category: Tests	
Target version: 1.11.0	
Difficulty: trivial	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/2941	
Description The issue is that the patch from referenced issue allowed multiple leases on same MAC address. This is what happens when initramdisk initializes network, acquires one IP, then booted linux acquires another one (on the same interface). We were testing two different MAC addresses, which is indeed green too.
