

Installer - Bug #12657

puppet-foreman uses deprecated fact \$::selinux

12/01/2015 09:25 PM - Brandon Weeks

Status: Rejected	
Priority: Normal	
Assignee: Brandon Weeks	
Category:	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.10.0
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/puppet-foreman/pull/378	
Description	
<p>Error: Could not retrieve catalog from remote server: Error 400 on SERVER: Evaluation Error: Error while evaluating a Function Call, str2bool(): Unknown type of boolean given at foreman/manifests/install.pp:37:30 on node foreman.localdomain</p> <p>While attempting to discover the root cause of this error I determined that Puppet was returning "permissive" instead of a boolean for \$::selinux. It's unclear to me exactly why this is happening, it however did lead me to discover that \$::selinux has been deprecated and replaced by \$::selinux_enforced</p> <p>https://docs.puppetlabs.com/facter/3.1/core_facts.html#selinux</p>

History

#1 - 12/01/2015 09:50 PM - Brandon Weeks

- Assignee set to Brandon Weeks
- Pull request <https://github.com/theforeman/puppet-foreman/pull/378> added

For what it's worth, it fixed our issue. Still no idea what the root cause was.

#2 - 12/03/2015 08:49 PM - Brandon Weeks

- Status changed from New to Rejected

closing as invalid based on discussion on the PR.
