Description	
Warnings during Installation on CentOS7: warning: user uucp does not exist - using root warning: group uucp does not exist - using root	

History

#1 - 12/02/2015 07:57 AM - Dominic Cleal

- Project changed from *Installer* to *Packaging*
- Category set to *RPMs*

Probably from the filesystem inside the SCL runtime packages. Is this 1.10?

#2 - 12/02/2015 08:17 AM - Denis Müller

Please move the ticket to Katello projekt

#3 - 12/02/2015 08:22 AM - Dominic Cleal

- Project changed from *Packaging* to *Katello*
- Category deleted (*RPMs*)
- Triaged set to *No*

#4 - 12/21/2015 09:29 AM - Eric Helms

- translation missing: *en.field_release* set to *70*
- Triaged changed from *No* to *Yes*

#5 - 12/21/2015 04:26 PM - Justin Sherrill

At which step during installation did you see these errors?

#6 - 12/21/2015 04:55 PM - Justin Sherrill

- Project changed from *Katello* to *Packaging*
- Category set to *RPMs*

this does appear to be caused by ruby193-runtime. Gonna move back to foreman since its not katello related.

It appears that by moving to ruby 2.2 this will go away (installing rh-ruby22-runtime i do not see this warning).

#7 - 12/22/2015 02:52 AM - Dominic Cleal

- Status changed from *New* to *Resolved*
- translation missing: *en.field_release* deleted (*70*)

This will be fixed as Justin says by a change in packaging ([#7228](#)), but the bug exists in the software collections project.
