#### History

##### #1 - 12/03/2015 02:51 PM - Michael Eklund

I would like the option of always fetching from <http://mirror.centos.org/centos-7/7/> and not trying the subdirectories.

##### #2 - 12/04/2015 03:08 AM - Dominic Cleal

- Category set to TFTP

- Status changed from New to Feedback

- translation missing: en.field\_release deleted (63)

You can customise the URLs under Hosts > Installation media, so you can change it to use \$major instead of \$version if you wish.

##### #3 - 05/17/2017 11:10 AM - Anonymous

- Status changed from Feedback to Resolved
